

\$ASKOLD Token Whitepaper

Ancient Rus Meme Coin on Solana Blockchain

Executive Summary

\$ASKOLD is a Solana-based memecoin paying tribute to the legendary Prince Askold, one of the foundational figures of Kyivan Rus. The token combines historical heritage with modern decentralized finance technologies, creating a unique project with a deflationary model and an active community.

Key Features:

- Total Supply: 862,000,000 tokens (symbolizing 862 AD)
 - Transaction Tax: 3% (2% burned, 1% redistributed to holders)
 - Blockchain: Solana (SPL Token)
 - Contract Address: `5itemFgavrdSuJDwJVERQwR2q9pQAQHqWUZ6rV1ViDBq`
-

Historical Foundation of the Project

Prince Askold: The Legendary Ruler

Prince Askold was a legendary Varangian ruler who, along with Dir, led a group of Vikings to settle in Kyiv in the 9th century. According to the Primary Chronicle, Askold and Dir were warriors in Rurik's retinue who established their rule in Kyiv around 862 AD.

Key achievements of Prince Askold:

- **Military Leader:** Led bold military campaigns against Byzantium
- **State Founder:** One of the first rulers of Kyivan Rus'
- **Cultural Pioneer:** Among the first rulers in the region to consider adopting Christianity

Prince Askold's legacy as a fearless explorer, conqueror, and forward-thinking ruler mirrors the pioneering spirit of \$ASKOLD in the crypto realm - bold, visionary, and ahead of its time.

Technical Information

Tokenomics

Basic Information:

- **Token Type:** SPL Token (Solana Program Library)
- **Total Supply:** 862,000,000 \$ASKOLD
- **Initially Burned:** 2,000,000 tokens at launch

- **Model:** Deflationary

Transaction Tax Mechanism (3%)

Burn (2%): 2% of every transaction is permanently removed from circulation. This deflationary strategy reduces supply over time, aiming to increase scarcity and token value.

Holder Rewards (1%): 1% of every transaction is automatically redistributed among \$ASKOLD holders. The more you hold, the more you earn passively.

Anti-Manipulation Protection

- **Transaction Limit:** Maximum 8,620,000 tokens per transaction (1% of total supply)
 - **Anti-Whale Mechanism:** Prevents large manipulative trades
 - **Verified Contract:** Our smart contract is fully verified on Solana. You can review it openly via Solscan, ensuring full transparency and trust for the community
-

Roadmap

Phase 1: Foundation Laying

- Development and deployment of \$ASKOLD smart contract on Solana
- Launch of official website and branding
- Creation of Twitter, Telegram, and Discord channels
- Early adopter engagement

Phase 2: Market Penetration

- Token listing on Jupiter and Raydium
- Full-scale marketing campaign
- Reaching 1,000 holders milestone
- Listings on CoinGecko and CoinMarketCap

Phase 3: Ecosystem Strengthening

- Listing on tier 2 centralized exchanges
- Launch of \$ASKOLD NFT collection on Solana
- Formation of strategic partnerships
- Growing community to 10,000+ verified holders

Phase 4: Decentralization & Utility

- Implementation of DAO governance for \$ASKOLD holders

- Cross-chain interoperability exploration
- Launch of Web3 educational events
- Charity collaborations

Phase 5: Global Adoption & Legacy 🌍

- Integration of \$ASKOLD into metaverse ecosystems
 - Achieving 100,000+ holder milestone
 - Development of DeFi tools powered by \$ASKOLD
 - Global brand expansion
-

How to Buy \$ASKOLD

1. Connect to Jupiter:

- Visit jup.ag via your wallet browser
- Connect your wallet (Phantom or Solflare recommended)

2. Swap SOL for \$ASKOLD:

- Paste the \$ASKOLD contract address in the token search field
- Set the amount of SOL to exchange
- Adjust slippage (1-2% recommended)
- Complete the swap

Contract Address: `5itemFgavrdSuJDwJVERQwR2q9pQAQHqWUZ6rV1ViDBq`

Community and Security

Contract Audit

Yes, the \$ASKOLD contract on Solana has undergone a full security audit to ensure it functions as intended and poses no security risks. The audit was conducted by a trusted third-party firm and is publicly accessible via our website in the 'Documents' section.

Active Community

- **Telegram:** Main channel for discussions and news
 - **Discord:** Detailed technical discussions
 - **Twitter:** Official updates and marketing
 - **Ambassador Program:** Exclusive rewards for active participants
-

Risks and Disclaimers

Important to understand:

- Meme coins are high-risk investments
- Token value can fluctuate significantly
- Only invest what you can afford to lose
- The project is in early development stage
- Regulatory situation with cryptocurrencies may change

Recommendations:

- Do Your Own Research (DYOR)
 - Don't invest more than you can afford to lose
 - Follow official channels for up-to-date information

Заклучение

\$ASKOLD представляет собой уникальное сочетание исторического наследия и современных технологий блокчейна. Just like Prince Askold charted his legendary path through history, our roadmap for \$ASKOLD on Solana charts a bold and strategic journey from inception to long-term dominance in the blockchain ecosystem.

Проект стремится не только к финансовому успеху, но и к сохранению культурного наследия через инновационные технологии, создавая мост между древней историей и будущим децентрализованных финансов.
